EVOLUTIONARY TECHNOLOGIES INTERNATIONAL, INC. ANNOUNCES MAJOR NEW PRODUCT ENHANCEMENTS

Customer-driven enhancements make ETISolution© version 6.1 the most significant
ETISolution© release in more than 5 years

Wednesday, February 18, 2009 - AUSTIN, TX, - Austin, TX-based Evolutionary Technologies International, Inc. (ETI), a wholly-owned subsidiary of Versata Enterprises, Inc. (Versata), and a recognized innovator of data integration products, today announces the release of significant, new, customer-driven functionality for ETISolution©.

Operating within Versata's Business Automation Business Unit, and leveraging Versata's global development network, ETI has invested heavily in customer-driven product enhancements over the last 6 months. ETI customers are eagerly planning upgrades to ETISolution version 6.1, which increase product functionality and enhancements by 4x. Much of this new functionality is the result of Versata's innovative Customer Success Program initiative. Within this program ETI customers enjoy executive-level communication accompanied by a mutual commitment between Versata and the customer to intensely focus on customer success, mutually high ROI activities, and a high level of accountability to deliver the best functionality to market. This hallmark focus maximizes customer business impact and facilitates multi-decade relationships within Versata and ETI customers are rapidly seeing these tangible benefits.

"We are highly encouraged by the solid, high-value functionality improvements that our global development team has been able to generate, based on very meaningful and long-time ETI customer input. Being able to apply the tested Versata customer success and product development model to the ETI customer base, as well as to ETISolution, is already yielding serious advantages. Current and future ETI customers are going to be impressed," said Chris Ney, CEO of ETI. "We are already engaging select ETI customers who want to upgrade to 6.1 this quarter through one-on-one conversations as well as through invitational, quarterly conference calls where we update key customers on our product plans and solicit their votes for what matters most to them. We truly look forward to our next cycle of customer input and to an even more powerful release later this year."

Randy Jacobs, CEO of Versata Enterprises, commented, "Last year, we welcomed ETI to the Versata family and made a commitment to our customers to bring our broad and deep resources to deliver the highest level of customer success. We committed to transforming and re-energizing longstanding ETI customer relationships. We committed to leveraging Versata's global scale with a focus of making ETI's products the preeminent, lowest total cost of ownership and highest quality data integration technology. Building on ETI's more than 18 years of market expertise, and incorporating this vision with Versata's global resources, I am pleased to say that 6.1 represents a huge step toward executing on these goals. Our approach, as validated by this release, will enable our customers to advance business priorities in 2009 and 2010."

ETISolution is a highly scalable, cross-platform application integration and data integration platform. ETISolution allows the customer to automatically generate detailed and accurate integration process documentation while simultaneously creating, deploying, and managing integration processes over the network to unlimited mainframe, Unix or windows

unlimited servers. Some of the much-anticipated enhanced functionality includes; enhanced process workflow visualization, improved memory and performance enhancements, conversion compiler enhancements, improved metadata management and impact analyst functionality, enhanced resynchronization of mapping specifications and conversion, an improved template work area interface, and numerous DSL improvements.
